Final V2	DATE	CONSULTING FIRM	Final V2. Submitted for Reference As a reference, the final version of the IFP Requirements document has been updated based on the information received with Sign-off.

Ownership of Work Product Statement

Per section 13 of the CLIENT (Client)-CONSULTING FIRM agreement dated DATE, CONSULTING FIRM grants Client a perpetual, limited, non-exclusive, non-transferable fully paid up royalty free license to use the Work Product contained in this Deliverable document, subject to execution of a Master Services Agreement (MSA) with CONSULTING FIRM. If such an MSA is not entered into, then CONSULTING FIRM shall have the right to withhold or retract various Deliverable components including system prototypes, screen shots and specifications, and functional and technical configuration elements. Should CONSULTING FIRM exercise this right, it will promptly provide to Client a revised set of Deliverables with the above elements excluded and will require Client to return the above elements and any drafts, copies, notes or electronic copies containing such components with a certification from a Client corporate officer that Client has carried out this obligation.

Document Approval

CLIENT Online Sales Tool Individual and Family Plans Functional Requirements Document Approval

I have participated in the requirements definition process and approve the contents of the *CLIENT IFP Functional Requirements Document Version Final – Dated DATE.*

Open Issues

The following open issues have been identified regarding the IFP Requirements of the online sales tool (OST). These issues are summarized below, and are also noted within their various sections of this document. Finalization and approval of this document will exclude the functionality pertaining to the open issues. Once these issues are resolved and finalized, the requirements document will be revised to include their respective resolutions.

1. Need to determine if fulfillment vendor, FULFILLMENT VENDOR NAME will handle fax requests in addition to mail.

Section I: IFP Project Overview

IFP Project Overview

The Online Sales Tools project (OST) automates the sales cycle process to make it easier for both brokers and consumers to more easily interact with CLIENT. Over a twelve (12) month period, OST will deliver Online Sales & Quoting, Application Submission, Underwriting, Data Maintenance, Renewal and Reporting capabilities that meet CLIENT functional requirements for individual products including medical (including short term health), dental, and life. OST will also integrate OST applications to required CLIENT legacy systems, including, but not limited to, membership, contact management, and renewal systems. The OST project team will support product rollout and provide necessary training and documentation.

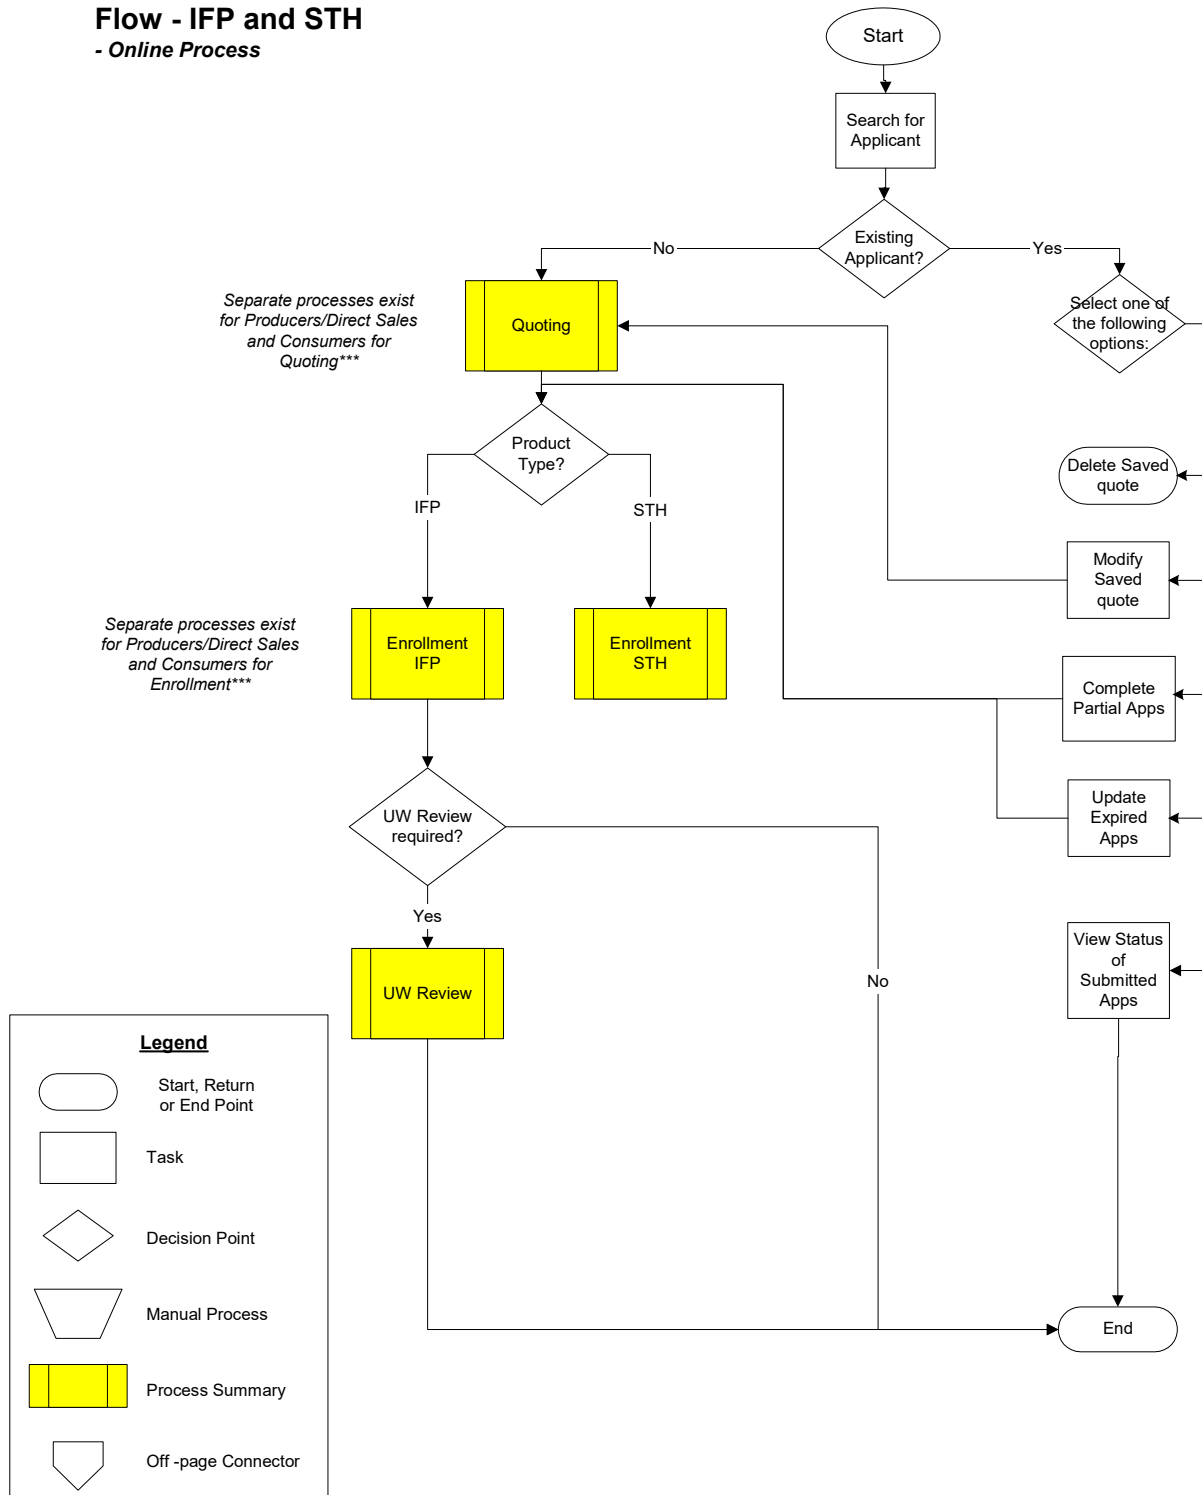

OST objectives include:

1. Reduce administrative costs associated with the sales cycle
2. Increase sales and membership through cross-selling opportunities for ancillary products
3. Open effective communication channel with brokers and consumers
4. Achieve parity with competition within California market

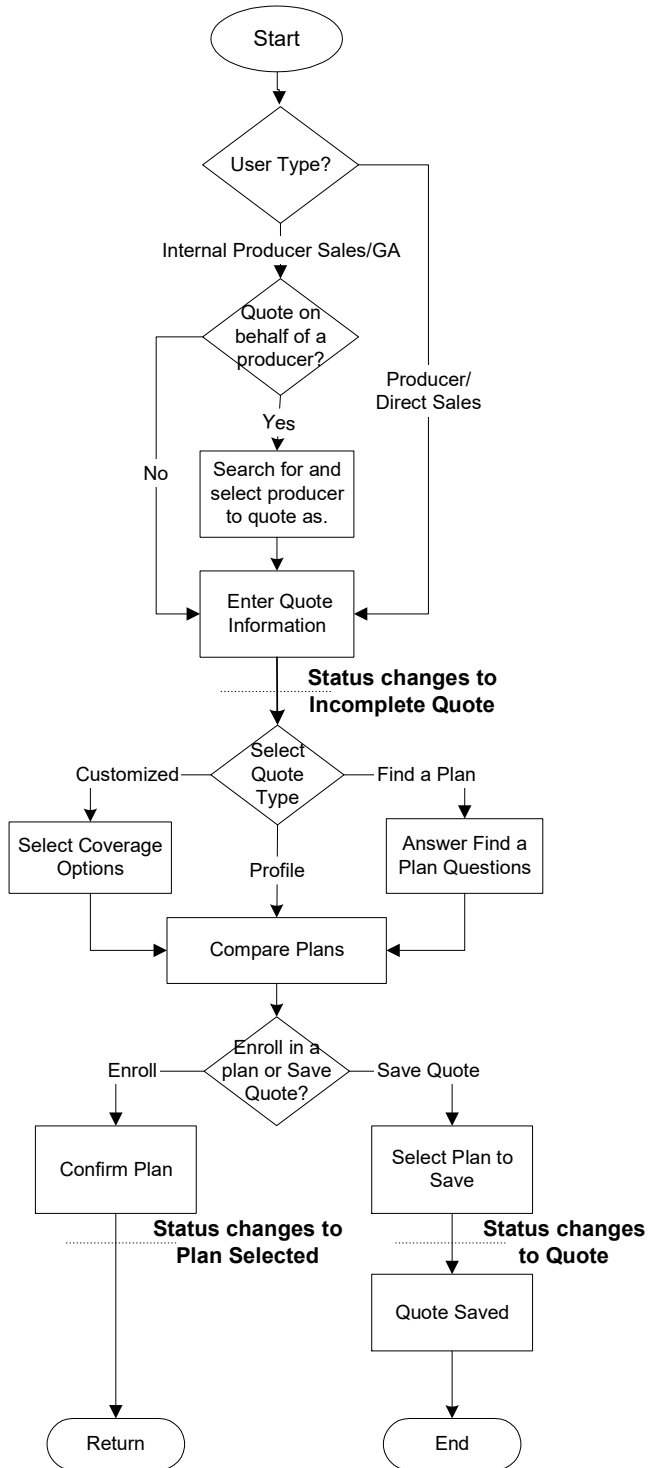

Section II: Business Process Flows

Eligibility Maintenance

Section III: User Communities

User Communities

The Individual & Family Products Online Sales Tool will support internal and external user communities. Each user group is listed below along with their OST responsibilities.

Internal User Groups	Responsibilities
General	
IFP Marketing	1. Helps producers quote when they have trouble
Direct Sales	
Sales Manager	2. Manages the direct sales team (including supervisors and reps) 3. Modifies Account Rep assignments to consumers
Sales Supervisor	4. Supervises Account Reps daily operations 5. Trains account representatives 6. Reports to Sales Manager
Account Rep	7. Sells directly to consumers 8. Has own work queue (for territory) 9. Accesses another account rep's territory to complete follow-up tasks, although originating agent remains the same 10. Logs communications 11. Generates quotes 12. Sets up regular and short term health applications for clients 13. Works with I&M Processor when there is missing information on an application 14. Requests fulfillment 15. Manages Up/Cross sell 16. Creates prospecting letters in SAMS 17. Reports to Sales Manager

Internal User Groups	Responsibilities
Account Coordinator Manager	18. Manages all supervisors and account coordinators 19. Modifies account coordinator assignments
Account Coordinator Supervisor	20. Supervises account coordinator daily operations 21. Trains account coordinators 22. Reports to Account Coordinator Manager
Account Coordinator	23. Manages lead generation in SAMS 24. Assists customers during the sales process who do not want to work with producer 25. Retains customers
Sales Coordinator	26. Same responsibilities as I&M Clerical and I&M Processing (see below)
Producer Sales	
Sales Manager	1. Manages all sales reps and sales assistants 2. Accesses sales rep and sales assistants work queues
Sales Rep	3. Manages a set group of producer sales within a defined territory 4. Completes follow-up tasks for another sales rep, although originating rep remains the same
Sales Assistant	5. Assists Sales Reps within his/her own region
I&M	
Supervisor	1. Redirects business to the appropriate underwriter 2. Performs all I&M Roles 3. Overrides letter generation 4. Moves final decision statuses back to a 'Processing' status if necessary. 5. Re-assigns tasks

Internal User Groups	Responsibilities
Manager	<ul style="list-style-type: none"> 6. Redirects business to the appropriate underwriter 7. Performs all I&M roles 8. Overrides letter generation 9. Moves final decision statuses back to a 'Processing' status if necessary. 10. Re-assigns tasks
Clerical	<ul style="list-style-type: none"> 11. Receives paper applications in the mail 12. Date stamps paper applications 13. Separates and staples the application 14. Enters the initial information for all IFP medical (paper) applications received (<i>Refer to Section V – Applications for the specific fields.</i>) 15. Handles splits on application (e.g. Youth Care) 16. If multi application (but one check), tracks the check on the first policy and references it for the others
Processing	<ul style="list-style-type: none"> 17. Inputs paper applications into the system (including demographic and medical conditions) 18. System scrubs paper applications for missing information post-data entry 19. System pends the application for missing information 20. Generates missing information correspondence for applicant and broker or DS agent 21. Forwards the application to underwriter for review (based on discretion) 22. System makes auto decision on application or manual status change to Withdrawn can be done by processor

Internal User Groups	Responsibilities
GI Processing	<ul style="list-style-type: none"> 23. System determines GI eligibility post-data entry 24. Inputs GI paper applications into OST 25. System scrubs GI paper applications for missing information post-data entry 26. System pends the application for missing information 27. Generates missing information correspondence for applicant and broker or DS agent 28. System makes auto decision on application or manual status change to Withdrawn can be done by GI processor
Alumni Processing	<ul style="list-style-type: none"> 29. Inputs Alumni paper applications into OST (including demographic and medical conditions) 30. System will auto-scrub Alumni paper applications for missing information post-data entry 31. System pends the application for missing information 32. Generates missing information correspondence for applicant and broker or DS agent 33. Forwards the application to underwriter for review (based on discretion) 34. System makes auto decision on application or manual status change to Withdrawn can be done by alumni processor
Auditing & Training	<ul style="list-style-type: none"> 35. Audits production staff's finalized applications 36. Reviews all applications in auditing work queue and updates status to continue 37. Overrides application status (e.g. auto-approvals) if audit proves incorrect entry and moves final decision status back to

Internal User Groups	Responsibilities
	'Processing' 38. Overrides letter generation
Customer Service	39. Services requests from prospective and current members
Producer Services	40. Services requests from producers
Consultant Analyst	41. Overrides letter generation
Analyst	42. Overrides letter generation
Trainee	43. Same responsibilities as a Processor, except all final decisions must be approved by an auditor before being processed.
Performance Management	44. Verifies all final decisions (does not have access to make any modifications or changes)
Underwriting	
Manager/Director	45. Manages all the underwriting processes 46. Modifies Underwriter assignments to applications 47. Overrides letter generation 48. Communicates with and receives communications from all other departments
Supervisor/Consultant Lead	49. Underwrites and finalizes 50. Audits trainee decisions 51. Overrides application status (e.g. approvals) if audit proves incorrect decision 52. Modifies Underwriter assignments to applications 53. Generates and can override letter generation 54. Communicates with and receives communications from all other departments
Senior/Intermediate	55. Underwrites and finalizes 56. Generates letter(s)

Internal User Groups	Responsibilities
	57. Overrides letter generation 58. Generates WFI request and reviews information received 59. Reviews claims history, prior coverage, medical history and Rx review 60. Adjusts rating tier based on underwriting decision 61. Reviews correspondence and appeal requests 62. Communicates with and receives communications from all other departments
Associate	63. Underwrites and finalizes 64. Generates letter(s) 65. Generates WFI request and reviews information received 66. Reviews claims history, prior coverage, medical history and Rx review 67. Adjusts rating tier based on underwriting decision 68. Reviews correspondence and appeal requests 69. Communicates with and receives communications from all other departments
Trainee	70. Same responsibilities as Associate except all decisions must be audited and approved before they are final 71. Communicates with and receives communications from all other departments
ABU	
ABU Product Management	72. Manages all of ABU 73. Accesses STH work queues 74. Quotes 75. Views the status of submitted online

Internal User Groups	Responsibilities
	applications
Technical Admin	76. Accesses all functionality
Customer	77. Completes applications online 78. Completes applications offline and sends to CLIENT 79. Changes quoting parameters after a producer or direct sales creates account. 80. Views status of a submitted application
General Agency (GA)/Super Producer (SP)	81. Quotes on behalf of a producer 82. Quotes as themselves 83. Completes applications on behalf of consumer 84. Checks status for submitted applications
Active Producer	85. Quotes 86. Quotes alumni plans and completes alumni applications on behalf of the consumer (alumni producer based on CLIENT) 87. Completes applications on behalf of consumer 88. Checks status for submitted applications
Non-Active/New Producer	89. Quotes 90. Checks status for submitted applications

1. Security Matrix Functionality Definitions

The security matrix is used to determine access to all functionality within OST. The following section describes the quoting and workflow functionality.

1.1 Functionality and Definitions

The following describes each section of functionality listed in the security matrix below. *Note:* Access to all functionality is based on user privileges.

Functionality	Definition
Profile	Allows the user to set up and maintain preferences.
Quote as Producer	Allows the user to search for a producer for whom he/she would like to generate a quote on behalf.
New Quotes	<p>Allows the user to generate a customized quote based on the plans and riders selected or use Find a Plan. Find a Plan is a tool that assists the user in determining the right plan. It consists of a series of questions that the user answers according to his/her (client's) preferences. Answers to each question are scored and health plans are sorted according to the number of total points assigned.</p> <p>In addition, users are able to save quotes generated as well as register for website access. Once registered, the consumer can return to the Individual & Family Products portal to view saved quotes as well as generate new quotes.</p>
Modify Quotes – Before submitting application	Allows the user to modify saved quotes before enrolling the client.
Modify Quotes – After submitting application	Allows users to modify information in the quote after the application has been submitted to CLIENT (e.g. edit effective date, plan name, etc) before generating a final rate and decision.
Message Center	The Message Center serves as a secure communication center for producers and CLIENT internal users. The Message Center is designed to function as a discussion forum, allowing users to send and receive messages.
Receives Auto Emails	Automatic emails are system-generated emails sent to a user based on an action performed within the Online Sales Tool. Users who receive auto emails will have the option to “opt out” of auto emails sent by the system. Each user will also have the option to opt back in if they so choose.
Work Queue	Allows the user to proactively manage their book of business from contact to customer. From here, users will be able to view follow-up tasks and book of business, search for a client/application, view detailed client information, and track a client's status.
Entering Online Applications	Allows the user to complete and submit applications online.

Functionality	Definition
Entering Offline Applications	Allows the user to enter paper applications received into OST for processing and tracking.
Viewing Submitted Applications	Allows the user to view applications submitted online or entered into OST.
Modifying Submitted Applications	Allows the user to modify applications submitted online or entered into OST.
Auditing	Allows the user to audit applications processed by trainees.
Client Details	Allows the user to view quotes generated for a client, start the application process for a client, check the status for a submitted application, track communications, and create follow-up tasks. In addition, users will be able to modify client contact information, modify sales rep assignments, and modify underwriter assignment (based on user group privileges). Users are also able to view and/or add new notes associated with the quote/application (depending on the status). All users with access to the client's information can view/add notes. <i>See Client Details functionality and definitions below for more details.</i>
Approving for a Past Effective Date	Allows the user to approve an application for a past effective date (e.g. GI coverage).
My Account History	Allows the consumer to view quotes generated, complete applications in process, check the status for a submitted application as well as view contact information for their producer or direct sales representative.

1.2 Client Details Functionality

The following describes each section of functionality listed in the Client Details security matrix below.

Note: Access to all functionality is based on user privileges.

Functionality	Definition
Modify Client Contact Information	Allows the user to view and/or modify contact information for his/her client.
Modify Producer Assignment	Allows the user to modify the (external) producer assignment for a consumer.
Modify Direct Sales Rep Assignment	Allows the user to modify the direct sales representative assignment for a consumer.
Modify Direct Sales Account Coordinator Assignment	Allows the user to modify the account coordinator assignment for a consumer.
Modify Underwriter Assignment	Allows the user to modify the underwriter assignment for an application.
New Communication/View Communication History	Allows the user to track communications with the client as well as view previous communications (this includes letters and message center emails generated regarding applicants as well as communications tracked by users).

Functionality	Definition
Follow-up Tasks	<p>Allows the user to set a follow-up task for a quote/application as well as view completed follow-up tasks. Each follow-up task set by a user is independent of another user's follow-up task.</p> <p>Users are also able to set follow-up tasks for other users as well as view all follow-up tasks associated with a client/application.</p>
Status Manager	<p>Allows the user to manually update statuses for an application as well as view the status history for all previous changes. Based on certain status changes, the user may be required to select a reason before the letter can be generated.</p>
View/Add Applicant Notes	<p>Allows the user to view and/or add new notes associated with an applicant during the underwriting process.</p>
Make Point Assignment	<p>Allows the user to make point assignments for a medical condition for a particular applicant.</p>
Add Medical Conditions	<p>Allows the user to add a medical condition(s) to an applicant's record.</p>
Override Letter Generation	<p>Allows the user to override the generation of an applicant letter.</p>

2. Security Matrix

Security functions are implemented that restrict access based on user privileges. The security matrix for quoting and workflow are displayed below.

2.1 Quoting and Workflow Security

The following is a summary matrix that denotes the quoting and workflow functions and access privileges for the user communities identified:

Internal User Groups	Profile	Quote as Producer	New Quotes	Modify Quotes (pre-submit)	Modify Quotes (post submit)	Message Center	Receives Auto Emails	Work Queue	Entering Online Applications	Entering Paper Applications into OST	View Submitted Applications	Modify Submitted Application	Auditing	Client Details	Approving for a Past Effective Date	My Account History
